DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/7/2003 has been entered.

Claim Rejections - 35 USC § 102

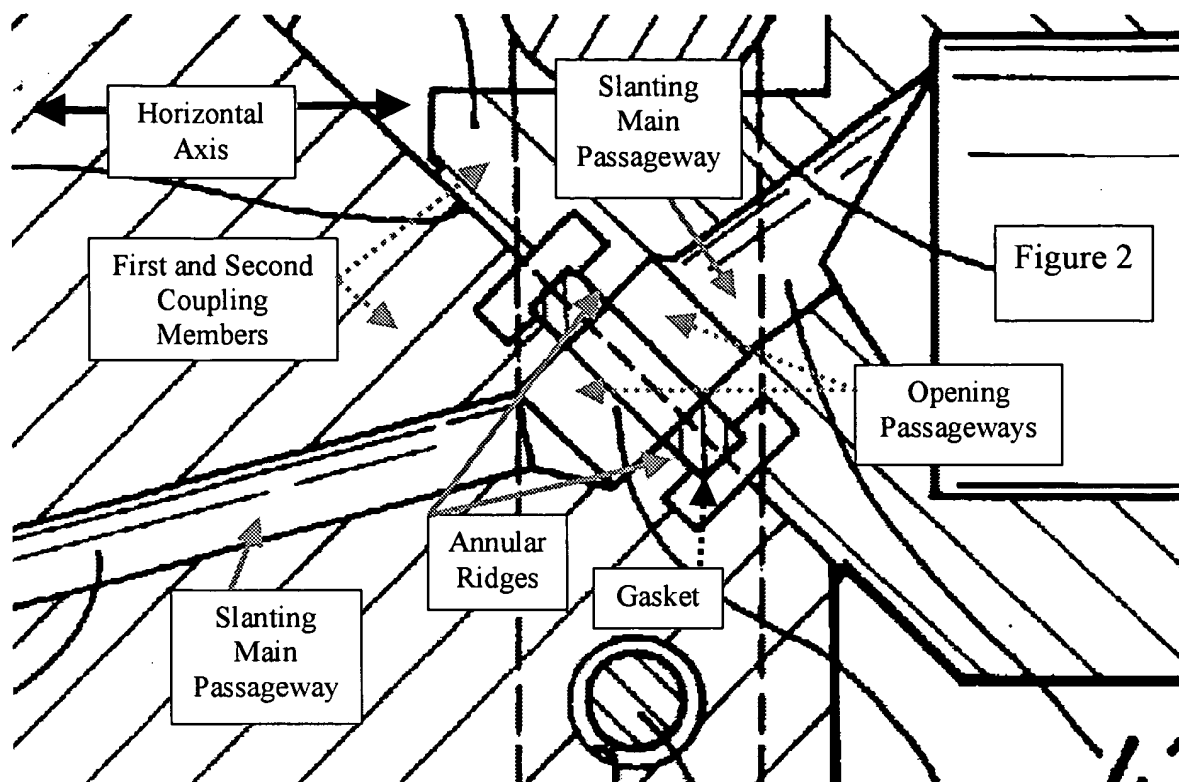

Claim 1 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by US patent 5967489, Nakazawa et al.

In regards to claim 1, in figure 2 below, Nakazawa et al discloses a fluid coupling comprising first and second coupling members having respective gasket holding annular ridges on butting end faces thereof; and

an annular gasket interposed between the first and second coupling members, wherein each coupling member has a fluid channel comprising an opening passageway orthogonal to the butting end face thereof, and a slanting main passageway communicating therewith, the opening passageway having a diameter equal to the inside diameter of the gasket holding annular ridge, and

the gasket holding annular ridges are in contact with the gasket at its radial midportion so as (capable) to relieve the inner peripheral portion of the gasket from stress concentration and wrinkles.

Response to Arguments

Applicant's arguments filed 11/17/2003 have been fully considered but they are not persuasive. The Applicant argues:

Nakazawa et al. fails to show any part of the 'seal portion' which corresponds to 'gasket holding annular ridges on butting end faces thereof', as recited in claim 1 and as represented by members 71a, 72a in Fig. 1(b) of the instant application

The Examiner disagrees. Clearly, Figure 2 of Nakazawa et al. illustrates part of the seal portion which corresponds to gasket holding annular ridges on butting end faces thereof, as recited in claim 1 and as represented by members 71a, 72a in Fig. 1(b) of the instant application.
